

Vegusto UK are participating at lunch! this year for the first time

In Q3, Vegusto plan to launch to the UK market the full range of Vegusto dairy-free Swiss cheeses, which is likely to be of interest to those businesses in the food sector that provide options for those with alternative diets. The Vegusto brand is well-known in Switzerland and has grown remarkably well over the last 15 years.

The Vegusto cheese range is suitable for customers with lactose intolerance or those who need to adhere to a low cholesterol diet. And with the growing number of people adopting vegan and vegetarian diets, the time may now be just right to bring these products to the UK.

Made with mostly organic ingredients, the Vegusto cheese range is low in fat, cholesterol free, dairy free, and according to feedback from their customers, it tastes absolutely amazing.
